

THE ENGINEERING TITLE ACT STUDY:

**The Practice/Title Act Distinction and
Protection of Public Health, Safety and Welfare**

Submitted to:

The California Department of Consumer Affairs

California Legislature

Joint Legislative Sunset Review Committee

November 2002

Institute for Social Research

California State University, Sacramento
6000 J Street, Sacramento, CA 95819-6101
(916) 278-5737 FAX (916) 278-5150

TABLE OF CONTENTS

Executive Summary of Significant Findings and Recommendations	i
Chapter 1. Introduction to the Title Act Study.....	1
Chapter 2. Theory of Professional Regulation: A Review of the Literature	5
Chapter 3. Engineering Licensure in California and its Comparison States.....	9
Chapter 4. Engineering Discipline, Employment Industry and the Registration of Engineers	21
Chapter 5. NCEES Examination Pass Rates	37
Chapter 6. Discipline Impacts on Public Health, Safety and Welfare	52
Chapter 7. Uses of Licensing by State and Local Agencies.....	97
Chapter 8. Overlap in Educational Preparation.....	109
Chapter 9. Discipline Task Profiles	128
Chapter 10. Overlap in NCEES Exams Outline Content.....	161
Chapter 11. Summary of Findings.....	197
Bibliography of Monographs	210
Bibliography of Periodical Literature	211
Data Reference Sources.....	218
Appendix A Disciplines Licensed by Massachusetts	219
Appendix B ISR Interview with Ten Comparison States on Regulatory Model and Request for Data	220
Appendix C Request for Consent of Release of Pass Rates	225
Appendix D Examples of Code Sections	226
Appendix E Titles included in the California Code of Regulations	230
Appendix F Agency List for California Code of Regulations	231
Appendix G California Universities Graduate Engineering Programs	232
Appendix H NCEES Exam Outline Review Material	239
Appendix I Comments in Response to Forum Questions from a Chemical Engineer Licensed in Three States.....	260

TABLE OF TABLES

Chapter 3

3.1	Historical Development of Engineering Licensing in California	15
3.2	Source of Identification as a Discipline-Based Licensing State.....	16
3.3	Status of Engineering Disciplines in California and the Nation.....	17
3.4	Ranking on Selected Demographic and Construction Variables of Potential Comparison States.....	18
3.5	Board vs. Agency-Dominated Classification of California and Ten Comparison States	19
3.5	Exemptions to Licensing in California and Ten Comparison States, 2001.....	20

Chapter 4

4.1	Distribution of Employed Engineers by Discipline for California and Ten Comparison States, 2000	25
4.2	Distribution of Employed Engineers by Discipline for Discipline-based and Generic Licensing States, 2000	26
4.3	Distribution of Employed Engineers by Discipline, 1988-90 and 2000	27
4.4	Number of Employed Engineers per 100,000 Population by Discipline for California and Ten Comparison States, 2000	28
4.5	Average Rate of Employed Engineers per 100,000 Population by Discipline for Discipline-based and Generic Licensing States, 2000	29
4.6	Distribution of Employed Engineers by Industry for California and Six Comparison States, 1998.....	30
4.7	National Distribution of Employed Engineers by Industry, Discipline and Year, 1988-1990 and 2000	31
4.8	Registration Rate Among Employed Engineers for California and Eight Comparison States, 2000.....	32
4.9	Number of Registered Engineers per 100,000 Population and per \$1,000,000 in Heavy Construction for California and Six Comparison States, 2000/2001	32
4.10	Registration Rate Among Employed Engineers by Discipline for California and Rhode Island, 2000/2001	33
4.11	Number of Registered Engineers per 100,000 Population by Discipline for California and Rhode Island, 2000/2001	34

4.12	Year License Issued by Discipline, for Engineers with Current California Licenses as of 2002.....	35
4.13	Percent of Currently Licensed California Engineers with Licenses Issued Before and After 1980.....	36

Chapter 5

5.1	Standard Normal (Z-Scores) for State Pass Rates on the Engineering Fundamentals Examination, 1997 - 2001.....	40
5.2a	Average Weighted and Unweighted Z-Scores for State Pass Rates on the Engineering Fundamentals Examination by Regulatory Model, 1997-2001	41
5.2b	Average Weighted and Unweighted Z-Scores for State Pass Rates on the Engineering Fundamentals Examination by Licensing Model, 1997-2001.....	41
5.3	Summary of Standard Normal (Z-scores) for California Pass Rates on All Discipline Examinations	42
5.4	Standard Normal (Z-Scores) for State Pass Rates on the Civil Engineering Examination, 1997 - 2001	43
5.4a	Standard Normal (Z-Scores) for State Pass Rates on the Civil/Transportation Depth Examination, 2000 - 2001	44
5.4b	Standard Normal (Z-Scores) for State Pass Rates on the Civil/Water Resources Depth Examination, 2000 - 2001.....	44
5.4c	Standard Normal (Z-Scores) for State Pass Rates on the Civil/Structural Depth Examination, 2000 - 2001	44
5.4d	Standard Normal (Z-Scores) for State Pass Rates on the Civil/Geotechnical Depth Examination, 2000 - 2001	45
5.4e	Standard Normal (Z-Scores) for State Pass Rates on the Civil/Environmental Depth Examination, 2000 - 2001	45
5.5	Standard Normal (Z-Scores) for State Pass Rates on the Mechanical Engineering Examination, 1997 - 2001	46
5.6	Standard Normal (Z-Scores) for State Pass Rates on the Mechanical Engineering Depth Examinations, 2001	46
5.7	Standard Normal (Z-Scores) for State Pass Rates on the Electrical Engineering Examination, 1997 - 2001	47
5.8	Standard Normal (Z-Scores) for State Pass Rates on the Chemical Engineering Examination, 1997 - 2001	47

5.9	Standard Normal (Z-Scores) for State Pass Rates on the Control Systems Examination, 1997 - 2001	48
5.10	Standard Normal (Z-Scores) for State Pass Rates on the Fire Protection Examination, 1997 - 2001	48
5.11	Standard Normal (Z-Scores) for State Pass Rates on the Industrial Engineering Examination, 1997 - 2001	49
5.12	Standard Normal (Z-Scores) for State Pass Rates on the Petroleum Engineering Examination, 1997 - 2001	49
5.13	Standard Normal (Z-Scores) for State Pass Rates on the Metallurgical Engineering Examination, 1997 - 2001	50
5.14	Standard Normal (Z-Scores) for State Pass Rates on the Nuclear Engineering Examination, 1997 - 2001	50
5.15	Standard Normal (Z-Scores) for State Pass Rates on the Agricultural Engineering Examination, 1997 - 2001	51
5.16	Standard Normal (Z-Scores) for State Pass Rates on the Manufacturing Engineering Examination, 1997 - 2001	51

Chapter 6

6.1	Percentage Distribution of Number of Claims, Claim Dollars and Client Fees by Discipline, DPIC 1996 - 2000	68
6.2	Percentage Distribution of Claims and Claim Dollars for Types of Damages by Engineering Discipline, DPIC 1996 - 2000	68
6.3	Percentage Distribution of Claims and Claim Dollars for Suing Parties by Engineering Discipline, DPIC 1996 - 2000	68
6.4	Percentage Distribution of Claims, Claim Dollars and Fees by Project Type and Engineering Discipline, DPIC 1996 - 2000	69
6.5	Fiscal Year in which Complaint Case Was Opened by Type of License Held by Subject of Complaint (California)	70
6.6	Cases Used for Analysis: Category of Code Section Allegedly Violated by Type of License Held by Subject of Complaint (California)	70
6.7	Type of Engineering License Held by Subject of Complaint and Source of Complaint by Fiscal Year in which Case Was Opened (California)	71
6.8	Compare California's Distribution of Complaints and Employed Engineers.....	72

6.9	Compare California's Distribution of Complaints and Registered Engineers	73
6.10	Percentage Distribution of California's Employed Engineers by Industry, 1998 .	73
6.11	Distribution of Licenses Held by Complaint Subjects (California).....	74
6.12	Distribution of Cases in License Categories (California)	74
6.13	Percentage Distribution of Violation Category by Source of Complaint (California).....	74
6.14	Percentage Distribution of Violation Categories by Fiscal Year in which Case Was Opened (California).....	75
6.15	Summary Percentage Distribution of Code Section Allegedly Violated by Fiscal Year in which Case Was Opened (California).....	75
6.16	Detailed Percentage Distribution of Code Section Allegedly Violated by Fiscal Year in which Case Was Opened (California).....	76
6.17	Percentage Distribution of Code Sections Allegedly Violated by Violation Categories (California)	77
6.18	Closing Code by Fiscal Year in which Case Was Opened (California)	78
6.19	Percentage Distribution of Closing Code by Source of Complaint (California) ...	79
6.20	Percentage Distribution of Closing Code by Violation Category (California).....	79
6.21	Percentage Distribution of Source of Complaint by Type of Engineering License Held by Subject of Complaint (California)	80
6.22	Percentage Distribution of Source of Complaint by License Categories (California).....	80
6.23	Percentage Distribution of Violation Categories by Type of Engineering License Held by Subject of Complaint (California)	81
6.24	Percentage Distribution of Violation Categories by License Categories (California).....	81
6.25	Summary Percentage Distribution of Section Allegedly Violated by Type of Engineering License Held by Subject of Complaint (California).....	82

6.26	Summary Percentage Distribution of Section Allegedly Violated by License Categories (California)	83
6.27	Detailed Percentage Distribution of Section Allegedly Violated by Type of Engineering License Held by Subject of Complaint (California)	84
6.28	Detailed Percentage Distribution of Code Section Charged by License Categories (California)	85
6.29	Percentage Distribution of Closing Code by Type of Engineering License Held by Subject of Complaint (California).....	86
6.30	Percentage Distribution of Closing Code by License Categories (California)	87
6.31	Compare Discipline Distribution of California Complaints and DPIC Insurance Claims	88
6.32	Distribution of Complaint Cases and Closing Codes by Discipline for California and Massachusetts	89
6.33	Category of Alleged Violation by Discipline for California and Massachusetts	90
6.34	Percentage Distribution for the Outcome of Massachusetts' Complaint Cases by Engineering Discipline	91
6.35	Percentage Distribution for the Outcome of Massachusetts' Complaint Cases by Category of Alleged Violation	92
6.36	Percentage Distribution of Type of Alleged Violation by License Status for California, Massachusetts and New York.....	93
6.37	Percentage Distribution of Summary Categories of Alleged Violation by License Status for California, Massachusetts and New York	94
6.38	Average Number of Closed Complaints Filed in California and Massachusetts per 100,000 Employed Engineers	95
6.39	Complaint Rates Against Licensed Engineers for California, Massachusetts, New York, North Carolina and Texas	96
6.40	Complaint Rates Against Unlicensed Subjects for California, New York and North Carolina	96

Chapter 7

7.1	"Hits" in Title 16 of California Code of Regulations	102
7.2	Unedited References to Types of Engineers in Federal, State and County Codes of Regulation	102
7.3	Edited References to Types of Engineers in State and Individual County Codes of Regulation	103
7.4	Types of References in State and County Codes of Regulation by Engineering Discipline	104
7.5	Prescriptive References in State and Individual County Codes of Regulation by Engineering Discipline.....	105
7.6	Summary of California State Personnel Board Engineering Job Class Registration Requirements	106
7.7	Distribution of California Permanent Civil Service Employees among Engineering Job Classes with and without Engineering Registration Requirements	108

Chapter 8

8.1	ABET Accredited Engineering Programs in California (Accreditation Period Ending September 30, 2001)	114
8.2	Summary of Undergraduate Options/Specializations/Concentrations	115
8.3	Undergraduate Options/Specializations/Concentrations in Disciplines <i>Not Regulated</i> in California	116
8.4	Undergraduate Options/Specializations/Concentrations in California <i>Practice Act</i> Disciplines	117
8.5	Undergraduate Options/Specializations/Concentrations in California <i>Title Act</i> Disciplines	119
8.6	Summary of Selected Graduate Program Specializations	120
8.7	Undergraduate Engineering Degree Programs and Specialties at Seven Study Schools by Discipline and Type of Regulation	121
8.8	Units Required for Engineering Degrees by School.....	122
8.9	Overlapping Units (Excluding General Education Courses) Required for Engineering Degrees by School.....	123
8.10	Percent Overlap by School.....	124

8.11	Percent Overlap (in Rank Order for Engineering Units)	125
8.12a	Educational Degrees Held by Chemical, Civil, Electrical, Industrial, Manufacturing, Mechanical, Metallurgical and Petroleum Engineers.....	126
8.12b	Highest Engineering Degree for Agricultural and Control Systems Engineers .	126
8.12c	Highest Educational Level Completed by Traffic Engineers	126
8.12d	Highest Level of Education for Structural Engineers.....	126
8.12e	Bachelor's Degree Program for Manufacturing and Metallurgical Engineers....	126
8.12f	Specialty of Highest Engineering Degree for Control Systems Engineers	126
8.13	Job Analysis Report Information on ABET Accredited Programs: Bachelor's Degree from ABET Accredited Program	127

Chapter 9

9.1	Items Rated Important on the Civil Engineering Occupation Analysis	133
9.2	Items Rated Important on the Special Civil Engineering Occupation Analysis .	134
9.3	Items Rated Critical on the Geotechnical Engineering Occupation Analysis	138
9.4	Items Rated Important on the Structural Engineering Occupation Analysis.....	141
9.5	Items Rated Important on the Electrical Engineering Occupation Analysis	144
9.6	Items Rated Important on the Mechanical Engineering Occupation Analysis...	145
9.7	Items Rated Important on the Agricultural Engineering Occupation Analysis ...	147
9.8	Items Rated Important on the Chemical Engineering Occupation Analysis	151
9.9	Items Rated Important on the Control Systems Engineering Occupation Analysis	152
9.10	Items Rated Important on the Industrial Engineering Occupation Analysis	154
9.11	Items Rated Important on the Manufacturing Engineering Occupation Analysis	155
9.12	Items Rated Important on the Metallurgical Engineering Occupation Analysis.	156
9.13	Items Rated Important on the Petroleum Engineering Occupation Analysis.....	157
9.14	Items Rated Important on the Traffic Engineering Occupation Analysis	159

Chapter 10

10.1	Contact and Participation Rates for Subject Matter Experts Reviewing NCEES Exam Outlines	171
10.2	Number of Experts who Reviewed Each Pair of Exam Outlines	171
10.3	Selection Criteria for Experts Comparing Pairs of NCEES Exam Outlines	172
10.4	Computation of Percent of Industrial Engineering Exam Content Covered on the Computers Depth Module of the Electrical and Computer Engineering Exam..	173
10.5	Computation of Percent of the Computers Depth Module of the Electrical and Computer Engineering Exam Content Covered on the Industrial Engineering Exam	174
10.6	Percent of Overlapping Content Among Practice and Title Discipline Exam Outlines (in Average Rank Order)	176
10.7	Number of Discipline Pairs with the Greatest Average Overlap in Exam Content.....	181
10.8	Percent of Title Act Discipline Exam Content Covered on Practice Act Discipline Exams	181
10.9	Percent of Civil Exam Content Covered on Other Exams.....	182
10.10	Percent of Electrical Exam Content Covered on Other Exams	183
10.11	Percent of Mechanical Exam Content Covered on Other Exams	183
10.12	Overlap in California Licenses.....	184
10.13	Sequence in which California Engineering Licenses were issued, for those with a License in More than One Discipline	185
10.14	Summary of Exams with More than Fifteen Percent Overlap in Content	186
10.15	Percent of Experts Identifying Overlap Between Sections of the Chemical Engineering Exam and Exams with Noteworthy (15%+) Overlap	187
10.16	Percent of Experts Identifying Overlap Between Sections of the Control Systems Engineering Exam and Exams with Noteworthy (15%+) Overlap	188
10.17	Percent of Experts Identifying Overlap Between Sections of the Fire Protection Engineering Exam and Exams with Noteworthy (15%+) Overlap	190
10.18	Percent of Experts Identifying Overlap Between Sections of the Industrial Engineering Exam and Exams with Noteworthy (15%+) Overlap	191

10.19	Percent of Experts Identifying Overlap Between Sections of the Manufacturing Engineering Exam and Exams with Noteworthy (15%)+ Overlap	193
10.20	Percent of Experts Identifying Overlap between Sections of the Nuclear Engineering Exam and Exams with Noteworthy (15%+) Overlap	194
10.21	Percent of Experts Identifying Overlap Between Sections of the Machine Design Depth Module of the Mechanical Engineering Exam and Exams with Noteworthy (15%+) Overlap	195
10.22	Percent of Experts Identifying Overlap Between Sections of the Structural Depth Module of Civil Engineering Exam and Exams with Noteworthy (15%+) Overlap	196
